

Jeu des combinaisons multiplicatives

Sélectionner les cartes qui correspondent aux tables que l'on veut travailler.

Les cartes sont distribuées entre chacun des joueurs, faces cachées.

Chaque joueur a devant lui un paquet de cartes faces cachées.

Le premier joueur pose sa première carte au centre de la table, face visible. C'est au tour du joueur suivant de faire de même en posant sa carte à côté de la précédente et ainsi de suite. Dès qu'un joueur constate qu'une carte noire est la multiplication de deux cartes rouges, il prend toutes les cartes sur la table, et les met sous son jeu.

Celui qui a emporté la mise relance le jeu.

Le jeu s'arrête dès qu'un joueur n'a plus de cartes.
